DATA SHEET**

RUBBERIZED CORK ANIT-VIBRATION PAD (SHOCK ABSORBER PAD)

Description :

Rubberized Cork Anti-Vibration Pad is produced with Granulated Cork Particles specifically selected and mixed with synthetic rubber. This combines the resilience of rubber with the natural compressibility of cork.

Rubberized Cork Anti-Vibration Pad Main Application :

All machines, whether generators or compressors, should be insulated in such a way as to reduce and, if possible, eliminate the transmission of vibration.

Product Data Sheet – Dolphin Brand :

We manufacture rubberized cork anti-vibration pad in custom sizes. Product Data Sheet will be provided based on customer specific requirements based on their required Dimensions and Weight.
